

Cable Reels

RAUSCH offers a variety of cable reels. DELTA is our manual push cable system. Alpha150 and Quadtro300 are both portable systems built to work with EcoStar400 and a camera tractor system. They can be built into a system, like the Quadtro300-SAT, a lateral cable line system, and the ELKA600, a mainline cable system with a telescopic arm. The latter two are only available built into a vehicle system.

Portable systems offer much more maneuverability, but you will be limited by the amount of cable available. The less time you have to spend exiting and entering a manhole, the more time you save.

Built-in vehicle systems offer a coordinated center for control and make it easier to insert and retrieve a tractor using the synchronized cable winding systems.

Portable: Manual push system *DELTA*

- Compact, lightweight and portable
- Ergonomic design, easy to pull & carry
- Electronic distance counter
- Up to 260ft of rigid push cable
- Integrated video screen
- 1 Joystick for controlling the camera
- Use with KS60CL Camera
- Or with KS45 Camera
 - For 2" to 8" pipe
 - Auto leveling of image
- ... And many more options!

Cable Reels

Portable or built-in: Alpha150 motorized main cable reel

- 150m (500ft) mainline cable
- Electronic distance counter
- Synchronized to camera tractor
- Cross-lead spindle for neat cable wind up
- Powerful electric motor
- Portable/mobile
- Sturdy design

Portable or built-in: Quadtro300 motorized main cable reel

- 300m (1,000 ft) main cable length
- Electronic distance counter
- Synchronized to camera tractor
- Can be used in connection with lateral cable reel, all fully synchronized
- Powerful electric motor
- Cross-lead spindle for neat cable wind up
- Integrated cable guiding system
- Integrated cable cleaning system
- Rear pendant
- Mechanical brake
- Sturdy design

Cable Reels

Built-in: Quadro-SAT lateral cable reel

- 450ft main cable connected to 100ft push cable
 - Electronic distance counter
 - Synchronized to main reel and tractor
 - Powerful electric motor
 - Cross-lead spindle for neat cable winding
 - Cable guiding system
 - Cable cleaning system
 - Mechanical brake
-

Built-in: ELKA600 motorized main cable reel

- Up to 1,700 ft main cable
- Fully synchronized
- Powerful electric motor
- Cross-lead spindle for neat cable winding
- Auto loop detection
- Auto cable payout
- Integrated electric brake
- Integrated telescopic swivel arm
- Electric chain hoist
- Halogen spot light
- Cable guiding system
- Cable cleaning system
- Emergency stop button
- Rear pendant
- Rack mounted with drawer and slide
